

Pole Inspection Information

SUBJECT: Osmose Utilities Services, Inc.

Dear Homeowner,

The City of Fountain Electric Department has contracted with Osmose Utilities Services Inc. to perform utility pole safety inspection and restoration services throughout our service territory.

Osmose crews will be working in the area to evaluate the condition of Fountain's poles and to perform any necessary maintenance. We ask that you allow Osmose personnel access to all City of Fountain electric facilities that are located within the utility easement that's on or adjacent to your property in accordance with Fountain Utilities Electric Department Rules and Regulations, Right of Access (Section 13.16.390 / Ordinance 682 § 2,1985).

Once on-site, the inspection process takes approximately 10-30 minutes per pole but can occasionally extend up to two hours when restoration activities are required.

We apologize for any inconvenience the completion of this important process may cause. **If you have any additional questions about the pole maintenance program, please contact Osmose at 478-451-7751.** You may also acquire more information by visiting their website at www.osmoseutilities.com.

You may also contact the City of Fountain Electric Department at 719-322-2092 with any questions or concerns you may have.

Thank you for your patience and understanding,

Kelly Barlow
