FOR IMMEDIATE RELEASE

Media Contacts: Curtis Mitchell
Utilities Director
719-322-2040

The City of Fountain Utilities Department is implementing Stage III Water Restrictions.

We are on the cusp of reaching peak demand, and in order to avoid using well water, at this time, we have determined the next best step is to implement water restrictions.

In attempt to avoid using our well water as a last resort to meet peak demand, and to continue providing 100% surface water, we are asking our customers to conserve. Immediately, Fountain Utilities is moving to Stage III Water Restrictions. This stage is includes:

- City irrigation limited to Monday and Friday
- Residential irrigation (even addresses) limited to Sunday and Wednesday
- Residential irrigation (odd addresses) limited to Tuesday and Saturday
- Commercial and industrial irrigation limited to Monday and Friday

We encourage customers to irrigate between 9:00p.m. and 6:00a.m. on their designated irrigation days. It is our intention to primarily use surface water, and that is the reason for the City of Fountain to move to Stage III of the Water Restrictions.

We will continue to monitor the water supply and water usage and keep the public updated on a regular basis. We want to thank our customers for partnering with us as we continue to address the water contamination concerns.
